

**EVERNOX®-B1171**

Synergistic Processing and Long-Term Thermal Stabilization

**Chemical Name**  
50% EVERFOS-168; 50% EVERNOX-1098

**Formula**  
50% C_{62}H_{63}O_{3}P  
50% C_{60}H_{64}N_{2}O_{4}

**Structure**  

![Structural formula of EVERFOS-168 and EVERNOX-1098]

**Molecular Weight**  
646.9  
637 g/mol

**CAS Number**  
Preparation (31570-04-4 and 23128-74-7)

**Specification**

**Applications**  
EVERNOX-B1171 has good compatibility, high resistance to extraction and low volatility. It provides excellent processing and long-term thermal stability as well as superior initial resin color. It can be used in combination with other additives such as costabilizers (e.g. phosphites, thioesters), light stabilizer (e.g. UV absorbers, hindered amines), and other functional stabilizers. The synergistic blend of EVERNOX-B1171 provides a great performance in polymer stabilization.
Recommendation usage
For polymers, the dosage level for EVERNOX-B117 varies between 0.1% to 0.25% depending on the polymer type and processing conditions. The optimum level is determined by the specific needs of application.

Handling & Safety
EVERNOX-B1171 should be handled with care and prevent contamination of the environment. Avoid dust formation and ignition sources.

For more detailed information please refer to the material safety data sheet.

Packing
The following packages are available upon customer’s request:
(1) 20 kgs × 2 PE bags in the carton box.
(2) 25 kgs × 2 PE bags in the carton box.
(3) Other specific request.

Transportation
EVERNOX-B1171 is not dangerous materials according to the transportation regulations.

Storage
EVERNOX-B1171 should be stored under suitable conditions (dry & cool). Maximum recommended storage temperature under 45°C and the storage time from the date of analysis: 24 months.
